SAP Development Namespaces

A step-by-step guide for customers with support agreements
SAP Global License Auditing Services

SAP

Agenda

- **Where to request namespaces**

- **Request a new namespace**

- **Add external assignment to another customer and installation number outside of your company**

- **Reassignment / Move to another customer and installation number outside of your company**

- **Search a namespace**

Where to request namespaces

https://support.sap.com/keys-systems-installations/keys/development-namespace.html

Click to access the namespace application

Request a new namespace

Select **+** icon to add a new namespace

Request a new Development Namespace

You can choose any name for the namespace, but it should have a recognizable reference to the company being

reserved. The names must be at least five characters in length, but not more than ten – including slashes.

The first and last characters are forward slashes ("/"). That´s why a maximum of eight characters

are available for each namespace. Both letters and numbers are permitted characters. In general,

namespaces that begin with a number or contain the character sequence e.g. 'SAP' or 'R3' are not available.

Only individual names are assigned (for instance "/CUSTOMER/" or "/SYSHOUSE/").

Create Namespace

/TEST4567/

Click ✔ to confirm your Namespace

Request a new Development Namespace

Customer number and Customer name are already filled in.

In Description enter a brief description for this namespace.

Click Create Namespace

Request a new namespace

Create New Namespace

Are you sure you want to create new namespace /TEST4567/ ?

Ok   Cancel

Click [Ok] to finish the reservation or Cancel to get back without a namespace creation

Agreement Relating to Namespace Reservation for Developments in SAP environment

SAP has provisionally reserved the namespace /BERLIN/ for the following company, hereinafter referred to as the Applicant.

By agreeing to this Agreement, the namespace specified above will be reserved definitively for the Applicant. This means that SAP will not permit any other SAP partner or SAP customer to use the reserved namespace for its developments.

The Applicant hereby accepts that, although SAP takes every possible precaution when issuing namespaces, SAP cannot completely exclude the possibility of errors occurring. Furthermore, SAP cannot prevent the unauthorized use by third parties of namespaces that have already been issued. SAP therefore cannot accept any claims made against it in this regard.

The namespaces issued may not be changed in any way. The Applicant also accepts that SAP's terms and conditions apply with respect to the admissibility of a development and to the marketing thereof. In particular, the Applicant hereby undertakes to protect the proprietary and trademark rights of SAP.

Furthermore, the Applicant undertakes to state clearly that the developments concerned are not SAP software, but that they are the Applicant's own inhouse developments, and that any claims made against SAP in this regard are therefore excluded. The Applicant shall indemnify SAP against any such claims.

In particular, the Applicant shall state clearly that SAP is under no obligation to render support services for these developments.

By agreeing, the Applicant declares its understanding of and agreement with the conditions specified above.
